ENVATHERM

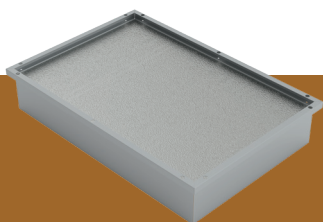

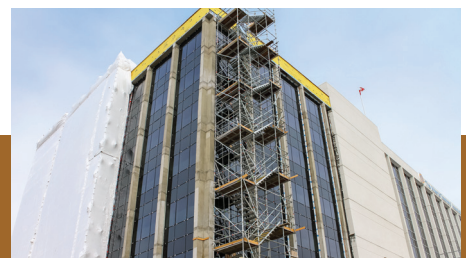

Self-sealing
insulation
that provides
a competitive R-value
for consistent real
world-performance.

Foam Filled Performance

Automated efficiency takes EnvaTherm insulated back pans and curtain-wall engineering to a new level. Innovation in foam delivery technology yields soft, even, self-sealing insulation that provides a competitive R-value for consistent, real-world performance. Unlike fibrous insulation, the insulation forms a self-sealing bond to the metal back pan shell so there is no risk of shifting/sagging or convective looping.

Product Features

-  *Galvanized steel/anodized aluminum*
-  *Fire-tested construction*
-  *Recycled content*
-  *Will not sustain mold growth*
-  *Fully certified manufacturing process*
-  *Up to 50% lighter than competing products*

Since 1996, Lenmak Exterior Innovations Inc. has been a leader in the automated manufacturing of exterior panels, cladding, roofing, and insulation using innovative, state-of-the-art technology.
