Range of colours/prints

Be More Cost-Effective

Standing seam metal roofing systems are suitable for commercial, institutional, and residential applications for buildings both large and small. They are adaptable to both low- and steep-slope designs and offer a wide range of size and finish options. In addition to offering exceptional value and longevity for building owners and occupants, metal roofing is a safe and environmentally-conscious alternative to other roofing materials.

Since 1996, Lenmak Exterior Innovations Inc. has been a leader in the automated manufacturing of exterior panels, cladding, roofing, and insulation using innovative, state-of-the-art technology.
