

# CUSTOM METAL PANELS

SlipClip - Less Friction,  
Relaxed Panels, Free Movement.

WALL CLADDING

# SHADOWCLAD

## ShadowClad, Strategic Reflection

ShadowClad panel system is a flush-wall panel concept with concealed fasteners and almost unlimited linear design flexibility. Strategic reflection of shadow and light creates the illusion of a building that moves and breathes as daylight fades.

## SlipClip, Installer Friendly

With SlipClip the panel is not fixed directly to the wall, allowing it to move freely with the conditions of the application. Use for horizontal and vertical installations. Allows unrestricted expansion and contraction of panels with temperature change. Prevent Oil Canning today!
