PANELS

Provide Ventilation and Drainage

Our vented hat channel was designed to securely attach exterior cladding systems, while still being able to provide ventilation and drainage in the wall cavity. It is customizable to meet a large range of wall build outs, cladding components, and rainscreen systems. With the option to change the gauge, depth, width, and venting, we can match almost any need. Its able to be installed both horizontally and vertically, with custom lengths ranging from 5'-10'. Standard venting is a 0.265" round hole pattern, yielding 6.84 in²/LF of ventilation.

Product Features

-  16 to 20 gauge galvanized steel
-  18 gauge black painted
-  Custom widths and depths
-  Pre-punched holes/slots
-  Installed horizontal/vertical
-  Custom etching available

Designed to be flexible and meet the demands of any rainscreen system.

Since 1996, Lenmak Exterior Innovations Inc. has been a leader in the automated manufacturing of exterior panels, cladding, roofing, and insulation using innovative, state-of-the-art technology.
